AMERCABLE IS COMMITTED TO SAFER, MORE PRODUCTIVE MINING

AmerCable provides outstanding cable products, engineering support, and customer service to help keep your mining operation running efficiently. Order your cables with factory installed couplers or terminations and you're ready to power up! Choose from two robust jacket options for maximize productivity in your operation's environment.

CPE JACKETS

AmerCable's unique mold-cured thermoset Chlorinated Polyethylene jacket provides the physical performance and strength needed to resist wear, tear, abrasion and compression cuts caused by everyday mining use.

This tough, durable jacket is a proven performer in mines throughout the world. AmerCable's engineered cable construction includes a taped-core, integral fill and tandem extrusion of the jacket layers. Two-pass jackets, extruded in tandem, yield an inseparable bond between the layers.

TPU JACKETS

For extremely abrasive environments, AmerCable's Thermoplastic Polyurethane (TPU) jacket provides the extra-tough physical characteristics needed in the roughest mining environments.

Compared to AmerCable's standard CPE jacketing material, TPU provides:

5X more abrasion resistance

2X more tear resistance

2X more tensile strength

Up to 8% Less Jacket Weight

Yellow

Red

Orange

AmerCable's
CPE and TPU colored
jackets experience no
loss of physical properties
compared to the
standard black jacket.

These brightly colored cables can improve mine safety by providing easy circuit identification.

Jacket1

Reinforced mold-cured thermosetting Chlorinated Polyethylene (CPE) Jacket. Cable identification via permanent marking. Black jacket is standard. Other colors available.

Tape

Non-conducting

Insulation Shielding

Tinned copper and color coded nylon braid

PURE INTEGRAL FILL for greater torsion resistance

APPLICATION

Heavy duty portable power cable for use in circuits not exceeding 2,000 volts. Designed for applications such as drills, conveyors, pumps and mobile equipment where grounding conductors, a ground check conductor and metallic shielding are required. Recommended maximum continuous conductor temperature is 90°C. Suitable for shallow water submersion.

Cable carries "P-184-MSHA" marking indicating acceptance as flame resistant by the Pennsylvania Department of Environmental Protection and the Mine Safety and Health Administration.

Tiger® Brand Cables meet or exceed ICEA Standards S-75-381/NEMA WC-58, ASTM B-172 and B-33.

RATINGS & APPROVALS

- Mine Safety & Health Administration 184-MSHA.
- Pennsylvania Department of Environmental Protection P-184.

Insulation Shielding

Tinned copper nylon braid

Assembly Taped core

APPLICATION

Heavy duty portable power cable for use in circuits not exceeding 15,000 volts. Designed for applications such as drills, conveyors, pumps and mobile equipment where grounding conductors, a ground check conductor and metallic shielding are required. Recommended maximum continuous conductor temperature is 90°C. Suitable for shallow water submersion.

and color coded Cable carries "P-184-MSHA" marking indicating acceptance as flame resistant by the Pennsylvania Department of Environmental Protection and the Mine Safety and Health Administration.

> Tiger® Brand Cables meet or exceed ICEA Standards S-75-381/NEMA WC-58, ASTM B-172 and B-33.

Control Group

Configuration to

Non-conducting

Reinforcement

Polypropylene reinforcing braid provides long

for greater torsion resistance

APPLICATION

Tiger® Brand 600-2,000 Volt two-conductor drilling mast cables are recommended for installations where long flex life, great flexibility and durability are desired. Applications include power and control for drill masts and other DC applications.

FEATURES

- Suitable for continuous operating temperatures of 90°C
- Suitable for use on drills, festoons, suspended loops and power tracks
- Heavy duty jacket offers excellent protection against abrasion, impact, heat, oil flame, ozone, alkali and acids.
- Extremely flexible stranding used for increased flexibility and ease of installation

RATINGS & APPROVALS

- 90°C Temperature Rating
- ASTM B-33: Standard Specification for Tinned Soft or Annealed Copper Wire for Electrical Purposes
- Materials meet or exceed ICEA S-75-381/NEMA WC-58, ASTM B-172 and CSA Standard C22.2 #96

^{*} Ampacity – Based on continuous duty at 90°C conductor temperature.

VFD POWER CABLE SHIELDED • 2000 VOLTS • 3 CONDUCTORS + 3 GROUNDS + GROUND CHECK(S)

Ground Conductors (x3)

Flexible tinned rope stranded conductors per ASTM B-172 and B-33, Insulated and colored green

Insulation

Type II EPR suitable for continuous operation at 90°C. Ozone resistant.

Shield

Overall tinned copper braid plus aluminum/ polyester tape providing 100% coverage

Jacket

Reinforced mold-cured thermosetting Chlorinated Polyethylene (CPE) Jacket. Cable identification via permanent marking.

Power Conductor

Extra flexible tinned rope stranded conductors per ASTM-172 and B-33

Ground Check Wire(s)¹

Flexible tinned copper with yellow insulation. Center ground check available

APPLICATION

A flexible, braid and foil shielded, 2kV power cable specifically engineered for use in variable frequency AC motor drive (VFD) applications.

AmerCable

Cable carries "P-184-MSHA" marking indicating acceptance as flame resistant by the Pennsylvania Department of Environmental Protection and the Mine Safety and Health Administration.

Tiger® Brand Mining Cable materials meet or exceed ICEA Standard S-75-381/NEMA WC-58 for Type SHC constructions; and ASTM B-172 and B-33.

SAFETY, TRAINING AND EDUCATION

Safety and maximized cable productivity are AmerCable's top priorities for our customers. Our highly experienced field engineers are available 24/7 for on-site evaluation and productivity solutions. They also conduct education and training sessions that address safety, splicing and cable handling practices.

No other cable manufacturer offers this high level of value and solutions!

MINE-CABLE SAFE

MineCable-Safe is an investment in Safety and Productivity that brings the knowledge and experience of our field engineers to your mine. High voltage cables require special handling to get maximum service life and keep personnel safe. Can you identify the difference between a productivity problem and a safety issue?

Our experts can. We deliver a highly-valuable report that clearly identifies safety and productivity issues. The report includes recommendations on how to deploy, move and utilize cables more safely and to make your mine more productive. Follow-up can also include training sessions and engineered solutions.

- Your cable assembly is built to your exact specifications and arrives ready for use
- Reduced prep, handling and installation time
- No need to maintain expensive connector inventory
- Professionally assembled
- Factory electrical testing before shipping
- AmerCable's on-time delivery rate and short lead times are #1 in the cable industry

JACKET ENHANCEMENT OPTIONS

TIGER STRIPES - STANDARD

AmerCable's standard **Tiger Stripes** provide an additional 21 color combinations for easier visual circuit identification. Stripes are vulcanized into the jacket and are available on contrasting jacket colors. Available on round CPE jacketed cables only.

Examples:

TIGER STRIPES - REFLECTIVE

AmerCable's reflective Tiger Stripes can extend cable life by reducing run-overs in low visibility situations. In addition to reducing run-overs, many customers now deploy our Tiger Stripes Reflective cables beside pit roads to help guide their hauler drivers at night. Available on round CPE jacketed cables only.

TIGER® BRAND ACTIV'LIGHT

ACTIV'LIGHT uses induced voltage to light up the SHD-GC trailing cable's full length during the shovel's mining activity. This higher level of visibility helps prevent runovers and costly downtime.

Available in 2kV - 25kV SHD-GC. CLEAR TPU jacket only.

AmerCable is the leading global manufacturer of surface and underground mining cables.

AmerCable is an ISO 9001 certified cable manufacturer that combines leading-edge technology, proven manufacturing techniques and high-quality service to deliver the finest mining cable products available.

AmerCable serves a worldwide customer base from our manufacturing facility in El Dorado, Arkansas. Our professional field engineers and customer support team work directly, or in partnership with a network of independent distributors, to deliver productivity enhancing cable solutions.

WHAT CAN YOU EXPECT FROM AMERCABLE?

- High-Quality Cable with an Emphasis on Safety
- On-Time Delivery
- Professional Sales, Support and Service
- Strategic Inventory Locations
- Short Lead Times
